

Fortune 500 Financial Services Organization

**56 PROJECTS
IN 25 DAYS**
migrated from
HP ALM to QMetry

**40% LESS TIME
CONSUMED**
on inefficient
non-testing activities

**30% COST
SAVINGS**
by implementing
QMetry

Overview

Our client is a Fortune 500, non-profit financial services organization headquartered in Minneapolis, Minnesota. It helps over 2 million clients through services like financial advice, insurance, investments, banking, and generosity programs.

They were using HP ALM to manage their test projects. The existing tool was not flexible and scalable, and did not have integration with AccelQ and their in-house automation tool. QMetry Test Management offered modern, scalable, agile, and enterprise grade test management tool enterprise-grade with seamless integration with test automation tools, CI/CD, and Jira. Additionally, it provided customized reporting with visual and query driven customization.

Business Need

- Needed to adopt DevOps and Continuous Testing by implementing contemporary tools
- Looking for new generation tool to integrate with their in-house automation tool, Jira and Jenkins
- Required hassle-free migration service to replace ALM
- Existing tool HP ALM lacked integration and advanced reporting

Benefits

✓ Ease of Agile adoption with Enterprise-grade test management tool

✓ Centralized testing tool for integrating with multiple automation tools

✓ Savings in administration cost such as infrastructure and maintenance by 50%

✓ Maximized testing efficiency through data parameterization and shareable test cases

✓ Management gained visibility into projects with Shareable Dashboards

Solution And Approach

The client explored different test management tools and shortlisted QMetry Test Management due to its enterprise-grade features. One of the major reasons for choosing QMetry was seamless and ready-to-use integration capability. The client was impressed with the smooth integration along with actionable insights in form of reports and dashboards.

Training

Extensive dedicated training of 8 hours was given to the team.

Migration

Client did migration from HP ALM of 56 projects in 25 days on their own using QMetry's migration utility.

Integration

QMetry provided simple integration with Jira for syncing stories and custom fields. It also provided SSO Integration with Oracle Access Manager.

Automation

Client is heavily using QMetry Automation agent to trigger automation scripts in AccelQ. They used Bamboo and Automation API to import test results in QMetry. Along with this, to import test results from client's in-house Selenium tool, QMetry created a translator that supports their result files.

Reporting

Client is leveraging QMetry's advanced reporting by sharing dashboards and custom widgets with the Senior Management to help with actionable insights.

We were stuck with HP ALM and wanted to move out of it. QMetry provided us extensive training and support for the migration of our projects. Absolutely fantastic support team! Real quick and responsive. QMetry is the best when it comes to providing the integration support with automation tools. It is easy, smooth and my team is in love with it.
